

# Protect Yourself

## Use Strong Passwords

~28 BITS OF ENTROPY

□□□□□□□□ □

□□□ □□□

□□□□

$2^{28} = 3 \text{ DAYS AT } 1000 \text{ GUESSES/SEC}$

(PLAUSIBLE ATTACK ON A WEAK REMOTE WEB SERVICE YES, CRACKING A STORED HASH IS FASTER, BUT IT'S NOT WHAT THE AVERAGE USER SHOULD WORRY ABOUT.)

DIFFICULTY TO GUESS: **EASY**

WAS IT TROMBONE? NO, TROUBADOR. AND ONE OF THE 0s WAS A ZERO?

AND THERE WAS SOME SYMBOL...

DIFFICULTY TO REMEMBER: **HARD**

~44 BITS OF ENTROPY

□□□□□□□□□□

□□□□□□□□□□

□□□□□□□□□□

□□□□□□□□□□

$2^{44} = 580 \text{ YEARS AT } 1000 \text{ GUESSES/SEC}$

DIFFICULTY TO GUESS: **HARD**

THAT'S A BATTERY STAPLE.

CORRECT!

DIFFICULTY TO REMEMBER: **YOU'VE ALREADY MEMORIZED IT**

THROUGH 20 YEARS OF EFFORT, WE'VE SUCCESSFULLY TRAINED EVERYONE TO USE PASSWORDS THAT ARE HARD FOR HUMANS TO REMEMBER, BUT EASY FOR COMPUTERS TO GUESS.

---

## Note

- Never use the same password for two accounts.
  - Use a password manager. Most password managers will create strong passwords for you.
  - For passwords that cannot be stored by a password manager (e.g. the password protecting your password manager, disk encryption passwords) or passwords that you want to be able to type easily (e.g. to a shared social media account), use a password made of several randomly chosen words.
-

---

## Instructions

1. Obtain 1 to 5 standard dice.
  2. Choose words randomly by rolling dice (if rolling multiple dice always read the dice left-to-right) looking up the 5-digit number in the word list. Write each word down and don't show it to anyone. (For example, rolling 1, 6, 4, 5, 1 selects the word vegan)  
  
If wanting to use only shorter words, roll four times and use 1, then the four rolled numbers to select your word.
  3. Do this 7 times for a total of 7 words - these words strung together make your passphrase.
  4. Write down your new passphrase and store it securely and away from your computer. When you use it, type as much of it as you can from memory. This helps most people memorize it within a few uses.
