Protect Yourself

Use Strong Passwords

Note

- Never use the same password for two accounts.
- Use a password manager. Most password managers will create strong passwords for you.
- For passwords that cannot be stored by a password manager (e.g. the password protecting your password manager, disk encryption passwords) or passwords that you want to be able to type easily (e.g. to a shared social media account), use a password made of several randomly chosen words.

66453 upturned	66536 vagrantly	66623 veal	66666 veteran

Instructions

1. Obtain 1 to 5 standard dice.
 2. Choose words randomly by rolling dice (if rolling multiple dice always read the dice left-to-right) looking up the 5-digit number in the word list. Write each word down and don't show it to anyone. (For example, rolling 1, 6, 4, 5, 1 selects the word vegan)
- If wanting to use only shorter words, roll four times and use 1, then the four rolled numbers to select your word.
3. Do this 7 times for a total of 7 words - these words strung together make your passphrase.
 4. Write down your new passphrase and store it securely and away from your computer. When you use it, type as much of it as you can from memory. This helps most people memorize it within a few uses.
